

OVER 30 YEARS OF PRESTIGIOUS FURNITURE PROTECTION

WHY KOVERROOS?

BECAUSE EVERY DETAIL MATTERS

KEEP OUTDOOR FURNITURE CASUAL

We all love our patio furniture, but do we love it enough? With the ever-growing time suck that is protecting against the elements, relaxing outdoors might present a challenge. Not on our watch.

We founded Koverroos® in 1985 because we wanted more out of patio furniture covers. The standard PVC covers were harmful to the environment and the very furniture they were designed to protect, thus began our exhaustive search for something better. Tyvek® was the perfect fit.

Tyvek® is lightweight, durable, breathable, and made from recyclable materials. Using those characteristics as a base, we have since launched three additional fabrics with improved properties. With less maintenance and wear, our customers can rest easy, along with their patio furniture. The end result? In the words of manufacturers, "Cover with KoverRoos, or don't cover at all."

WHAT'S IN A FABRIC?

TO THE TEST!

At KoverRoos, we put all fabrics through the wringer at an independent testing facility to ensure the highest standard in cover protection. Many competitors may claim breathability, but just don't hold up when it comes to measuring hydrostatic resistance against air permeability. Additionally, when exposed to direct QUV rays and straining, our fabrics passed with flying colors (as demonstrated below).

Low-End Competitor

500 hours

Middle-End Competitor

500 hours

High-End Competitor

500 hours

KoverRoos III

750 hours

Weathermax

1,500 hours

DUPONT TYVEK®

Incredibly lightweight, yet surprisingly strong, handles extreme weather from temperatures -100° to 240° F

KOVERROOS® III

Same qualities as Tyvek® except slightly thicker with a soft inner layer for improved durability in harsher conditions.

7 - YEAR WARRANTY

Products are warranted to be free of defects from workmanship and materials. 7 years for Tyvek® and KoverRoos® III, 10 years for SupraRoos™ and Weathermax™. Policy: Free repair, 50% discount off replacements.

SUPRAROOS™

Uses Dupont™ two-layer technology doubling strength. Outer layer provides top UV protection while the inner layer adds strength.

WEATHERMAX™

A solution-dyed polyester. Super high strength and durability combine with long-term color retention. Available in 7 different colors.

10-YEAR WARRANTY

SELECTION AND OPTIONS

TAKING THE HASSLE OUT OF CASUAL LIVING

With over 120 patterns and styles in 4 different fabric options, and 10 different colors, we have a cover to fit almost all furniture and personal tastes. But sifting through 1500 different cover combinations doesn't have to be a hassle. We've built a cover finder at <http://www.koverroos.com>, so simply enter in width, depth, and height, and it will instantly take you to the perfect fit.

GRILLS

KoverRoos has always been proud to use environmentally friendly materials that can be recycled after their useful life. We are committed to avoiding the standard Vinyl (PVC) or PVC-coated polyester, **so harmful that its manufacturing has been banned in the U.S. for decades.** Our breathable fabrics are the smarter, safer choice for the great outdoors and outdoor furniture alike.

CUSTOM COVERS

While we cover most standard sizes, some pieces are just too unique. We make custom covers. Contact customercare@authentek.com for additional info.

EASY ON, EASY OFF

Our "it's a cinch" attachment system ensures a snug fit, eliminating sagging and reducing wind movement.

PATENTED TECHNOLOGY

Our umbrella covers are equipped with a metal band similar to a tape measure. This allows the cover edge to be stiff enough to put on, but foldable for later storage.

The 'drain trough' system was designed to allow water to run off between each dining set chair, virtually eliminating tabletop puddles.
